

DK LEARNING

Python Introduction

What is Python?

Python is a high-level programming language used for software, automation, data work and education.

print()

The print() function displays information on the screen. Example: `print('Hello DK Learning')`

Variables

A variable is a name used to store a value. Example: `name = 'Student'`.

Conditions

An if statement lets a program make a decision based on a condition.

Activity Preparation

Write a small program that displays your name, grade and favourite subject.
