

DK LEARNING

GRADE 1

Computer & Digital World

Level: **Starter** • Purpose: Learn before you practise

[← BACK TO LEARNING WEBSITE](#)

In this guide

1. What is a Computer?
2. Parts of a Computer
3. Using the Mouse
4. Using the Keyboard
5. Staying Safe with Computers
6. Practice questions, answers and glossary

How to use this guide

Read each chapter slowly. Look at the example, then try the “Your turn” task **without copying**. Write your own notes on the lines. When you finish, answer the practice questions and check your work with the answer page. After that, open the Grade 1 activity on the website.

Learning goals

- Say what a computer is and name its main parts
- Use a mouse and keyboard correctly
- Name devices in the digital world around us
- Follow basic computer safety rules

Study plan

Step	What to do
1	Read the chapter and highlight key words
2	Study the worked example
3	Do the “Your turn” task on paper or on a computer
4	Write a short summary in your own words
5	Answer the practice questions, then check

Tip: Short, regular practice is better than one long session. Ten minutes a day helps you remember.

1 What is a Computer?

A computer is an electronic machine that helps us create, learn, calculate, draw and communicate. It follows instructions to do jobs very quickly.

Computers need electricity to work. Some computers are big and stay on a desk. Others are small and can be carried, like a laptop or a tablet.

Key points

- A computer is an electronic machine
- It helps us learn, draw, play and talk to people
- It needs electricity or a battery
- It cannot think by itself; people give it instructions

Worked example

You use a computer to draw a picture of your home.
The computer shows the colours on the screen and saves the picture for later.

Your turn

List three things you can do with a computer. Draw one of them.

Check yourself

Explain each term in your own words:

Computer

Electricity

My notes

2 Parts of a Computer

A computer has parts that work together. The monitor shows pictures and words. The keyboard lets us type. The mouse helps us point, click and select. Speakers play sound and the printer puts information on paper.

The main box that does the thinking work is called the system unit or CPU. In a laptop, all the parts are built into one body.

Key points

- Monitor = shows pictures and words
- Keyboard = used to type
- Mouse = point, click and select
- Speakers = play sound; Printer = prints on paper

Worked example

Point to each part and say its job:

monitor -> see, keyboard -> type, mouse -> click, speaker -> hear.

Your turn

Match: Monitor, Keyboard, Mouse, Speaker with seeing, typing, clicking, hearing.

Check yourself

Explain each term in your own words:

Monitor

CPU

My notes

3 Using the Mouse

The mouse moves a small arrow on the screen called the pointer. Move the mouse slowly and the pointer follows. Press the left button once to click. Press twice quickly to double click. Hold the button and move to drag.

Rest your hand gently on the mouse. Do not squeeze it or hit it.

Key points

- One click selects something
- Double click opens a file or program
- Drag moves a picture or window
- Hold the mouse gently

Worked example

Practice game:

1. Click a picture.
2. Double click a folder.
3. Drag the picture into the folder.

Your turn

Practise one click, a double click and a drag with a paint program.

Check yourself

Explain each term in your own words:

Pointer

Click

My notes

4 Using the Keyboard

The keyboard has letter keys, number keys and special keys. The Space bar makes a space between words. Enter starts a new line. Backspace removes a mistake. Hold Shift to type a capital letter.

Sit up straight, keep your wrists relaxed and look at the screen, not the keys, when you can.

Key points

- Letters and numbers are typed with keys
- Space bar = space; Enter = new line
- Backspace = remove the last letter
- Shift = capital letters

Worked example

Type your name like this:
SHIFT + d, then a, n, i, s, h
Result: Danish

Your turn

Type your name and the name of your school using Shift for capital letters.

Check yourself

Explain each term in your own words:

Key

Shift

My notes

5 Staying Safe with Computers

Computers are fun, but we must use them safely. Keep your hands clean and dry. Do not pull the cables. Do not eat or drink near the computer. Ask a trusted adult before changing settings or opening unknown things.

Never tell anyone your password. A password is a secret, like the key to your house.

Key points

- Keep food and drink away
- Do not pull cables or hit the computer
- Never share your password
- Ask a trusted adult when something is strange

Worked example

A pop-up says: You won a prize! Click here!

What should you do?

Answer: Do not click. Tell a trusted adult.

Your turn

Write one safe computer rule for home and one for school.

Check yourself

Explain each term in your own words:

Password

Trusted adult

My notes

Practice Questions

Part A - Choose the best answer

1. Which part shows pictures and words?
 - A) Monitor
 - B) Keyboard
 - C) Mouse
2. Which device helps us type?
 - A) Speaker
 - B) Keyboard
 - C) Printer
3. Which part plays sound?
 - A) Mouse
 - B) Monitor
 - C) Speaker
4. Should we share our password?
 - A) Yes
 - B) No
 - C) Only with friends
5. Pressing the left button twice quickly is a...
 - A) click
 - B) double click
 - C) drag
6. A computer needs...
 - A) Water
 - B) Electricity
 - C) Sunlight only

Part B - Short answers

1. Name two parts of a computer.

2. What does the Space bar do?

3. Why should we keep a password secret?

4. Who do you ask if something strange appears?

Answer Page

Part A

1-A 2-B 3-C 4-B 5-B 6-B

Part B (sample answers)

1. Any two: monitor, keyboard, mouse, speaker, printer.
2. It makes a space between words.
3. So nobody else can use our account.
4. A trusted adult.

Mini glossary

Computer	An electronic machine that follows instructions
Electricity	The power that makes a computer work
Monitor	The screen that shows what the computer is doing
CPU	The part that works on instructions
Pointer	The small arrow that moves on the screen
Click	Pressing a mouse button to choose something
Key	A button on the keyboard
Shift	A key that makes capital letters
Password	A secret word that keeps your account safe
Trusted adult	A parent, teacher or guardian who helps you stay safe

Activity Preparation

Draw or label four computer parts and write one safe computer rule for each. Then open the Grade 1 activity.

Think before you start

- Explain one important idea from this grade in your own words.
- Give one real-life example where this topic is useful.
- What mistake could a beginner make, and how can it be prevented?
- Write the steps you will follow before starting the Grade 1 activity.

Ready checklist

- | | |
|---|--|
| ☐ I read every chapter | ☐ I tried the “Your turn” tasks |
| ☐ I understand the key terms | ☐ I checked my practice answers |
| ☐ I wrote my own notes | ☐ I am ready for the activity |
