Internet Safety

What is the Internet?

The Internet is a worldwide network that allows devices and people to communicate and share information.

Strong Passwords

Use long passwords or passphrases. Do not share passwords with strangers.

Personal Information

Be careful when sharing your full name, address, phone number, school details or passwords online.

Safe Links

Do not open suspicious links or download unknown files. Check the source first.

Activity Preparation

For the activity, identify five safe and five unsafe online behaviours.
